Subject Index to Volume 12

Aluminium, bone, Camelford water poisoning accident: serial neuropsychological assessments and further observations on, 37
4-Aminophenol-induced toxicity, to renal proximal tubules, studies on the mechanism of, 383
Anticholinesterases, in humans and animals, behavioural toxicity of: A review, 3
Antipyrine, *in vitro* studies on the metabolism of, in the pig and rat: with special reference to veterinary medicine licensing, 537

Beryllium, mobilization and distribution of, over the course of chelation therapy with some polyaminocarboxylic acids in the rat, 19
Body weight, survival, and pathology of the Charles River Sprague–Dawley-derived rat prior to and since the introduction of the VAF^R variant in 1988: fat, frail and dying young, 87
British Toxicology Society
and the history of toxicology, 461
speciality sections and the, 359
Bronchoalveolar lavage, identification of epithelial cells in, 43
2-Butoxyethanol, and its major metabolite, butoxyacetic acid, in various mammals including humans, assessment of the haemolytic activity of, 305

Charcoal, medical, for a child's poisoning at home: availability and success of administration in Finland, 29
Chelating agents
efficacy of dimercapto, for the treatment of poisoning by percutaneously applied dichloro[2-chlorovinyl]arsine in rabbits, 241
evaluation of a new, for cadmium: a preliminary report, 247
Chromium, monitoring of total, in rat fluids and lymphocytes following intratracheal administration of soluble trivalent or hexavalent chromium compounds, 377
Cimetidine, interaction of, with cytochrome P450 and effect on mixed-function oxidase activities of liver microsomes, 147
Creatine excretion, an investigation of urinary, as a potential marker for testicular damage, 173
Cyanide poisoning, protection against, by the co-administration of sodium nitrate and hydroxylamine in rats, 33
Cyclosporin A, short-term effect of various doses of, on plasma lipoproteins and its distribution in blood: an experimental study, 141
Cysteine conjugate toxicity, in a human cell line: correlation with C-S lyase activity in human hepatic tissue, 329

Desferriooxamine treatment, reduces histological evidence of lung damage in rats after acute nitrogen dioxide [NO_2] intoxication, 389
Diazinon, *in-vitro* and *in-vivo* adsorption studies of, 301
Dichloromethane, to carbon monoxide in rats, effect of methanol or modifications of the hepatic glutathione concentration on the metabolism of, 227
1,2-Dichloropropane nephrotoxicity, *in-vitro* mechanisms of, using the renal cortical slice model, 117
Dimethylacetamide (DMAc), toxicokinetics of, in rat isolated perfused liver, 127
Dioxins and furans, analysis of polychlorinated, in samples of the toxic oil syndrome, 273
Dose setting, in *in-vivo* mutagenicity assays, report of the BTS/UKEMS working group on, 189

Enzyme inducer, effects on rat thyroid function of an hepatic microsomal, 153
Experiments, role of *in-vitro*, in animal welfare, 522

Fentanyl, ketamine and thalamonal, effect of, on some biochemical parameters in ethanol-treated and untreated dogs, 279
Flumazenil, effect of, in a model of acute alcohol intoxication in rats, 177

Gentamicin-induced nephrotoxicity, plasma lipid profile in rats with, 371
ß-Glucuronidase, selective inhibition of gastrointestinal, by polyvinylbenzyl D-glucaro[1,4]lactonate: attachment of D-glucaro[1,4]lactone to polyvinylbenzyl chloride, 181

Insect and scorpion stings/bites, poisoning due to, 123
Iron overload, hepatotoxicity associated with dietary, in mice, 463

Lead
effect of ingestion and inhalation of, on the reproductive system and fertility of adult male rats and their progeny, 165
exposure in iron-deficient rats, embryo-fetal development influenced by, 25
Lung, toxicology of the, 415

Malaoxon-induced brain phosphoinositide turnover, and changes in brain calcium levels by female gender in pregnant and non-pregnant convulsing and non-convulsing rats, 469
Methyl chloride (Nitromors) poisoning, a case of, effects on carboxyhaemoglobin levels, 159
Methyl isocyanate
-induced haematological and biochemical changes in rabbits?, Do the hydrolysis products, methylamine and *N,N'*-dimethylurea, play any role in the, 135
modulation of biochemical and cytological profile of bronchoalveolar lavage constituents in rats following split-dose multiple inhalation exposure to, 253
Methyl mercury, mercuric chloride and silver lactate, decrease superoxide anion formation and chemotaxis in human polymorphonuclear leucocytes, 361
Methyl parathion, chromosomal aberrations induced by, in human peripheral lymphocytes of alcoholics and smokers, 285

Omeprazole overdose, 541
Organophosphate poisoning, biochemical changes associated with muscle fibre necrosis after experimental, 365
Organophosphates, effects of, on skeletal muscle, 289
Organophosphorous intoxication, a scale to assess severity in: POP scale, 297
Organophosphorous pesticides, aging and spontaneous reactivation of human plasma cholinesterase activity after inhibition by, 497

Paraquat poisoning, effect of aggressive haemoperfusion on the clinical course of patients with, 323
Pentachlorophenol
carcinogenicity, extrapolation of risk from mice to humans, 215
poisoning, human, 479
Peroxisome proliferation, in male Wistar rats, interactive potential of omega-3 fatty acids with clofibrate or DEHP on hepatic, 337
Pharmacokinetics, modelling dermal
using *in-vitro* data: Part I. Fluazifop-butyl in the rat, 199
using *in-vitro* data: Part II. Fluazifop-butyl in man, 207
Plutonium and americium, removal of inhaled, from the rat by administration of ZnDTPA in drinking water, 233
Plutonium-239 and americium-241, biokinetics of, in the rat after subcutaneous deposition of contaminated particles from the former nuclear weapons site at Maralinga: implications for human exposure, 313
Propafenone urinary metabolic ratios, determination of oxidation phenotype by measurement of, 161
Protein excretion, urinary, and the diagnosis of graft rejection or renal dysfunction in renal transplant patients,

407

Salbutamol, a study of self poisoning with oral – laboratory and clinical features, 397
Saline cathartics, effect of, on gastro-intestinal transit time of activated charcoal, 403
Snake venom, a retrospective study of poisoning due to, in Zimbabwe, 15
Sodium bromide, the no-effect level of, in healthy volunteers, 9
Stress, the effect of, on toxicological investigations, 265

Toxicity testing
  benefits of good laboratory practice as a tool to improve, 528
  implications of animal welfare on, 516
  new trends in toxicology and their impact on – scientific and practical aspects, 511
  toxicological testing in the European Community, 533
  use of the dog in, on pharmaceutical compounds, 99
Toxicity testing, in Europe
  mechanisms to increase effectiveness of, 507
  WHO consultation on mechanisms to increase effectiveness of, 505
Toxicology
  a focus on human, 263
  the history of: the long and short of it, 459
  new trends in, and their impact on toxicity testing – scientific and practical aspects, 511

Veratrum album, intoxication from, 111
